Put a LID on the problem of sanitary disposal

STRICTLY / KHAS
SANITARY NAPKINS ONLY
untuk membuang tuala wanita terpakai sahaja

- **Discreet** : Your female staff will appreciate the thought you've given to their problem. The Sanitary Bin System fits discreetly into each cubicle for convenience and ease.
- **Convenient** : Our fully trained female team sees to the entire process or removal, installation and maintenance of the Sanitary Bin System.
- **Hygienic** : Powerful bactericide at the base on each Sanitary Bin unit sterilise contents while a perfumed vapour prevents unpleasant odours.
- **Effective** : Forget old pedalpush bins and ordinary dustbins; Sanitary Bin disposes of towels and tampons using the environmentally safe and effective method.
- **Compact** : Each Sanitary Bin unit fits snugly into the cubicle and the flap lid has a disposal tray that keeps the contents hidden even when the lid is lifted. Ultimately, the Sanitary Bin System contributes to a more pleasant, hygienic workplace; for a more conducive environment and a positive image for your establishment.

STAYFRESH SANITARY BIN DISPOSAL SERVICE

- * to relief all distressing problem for the ladies
- * no more blocked pipes
- * no more lost of toilet facilities
- * no more costly plumbing repairs
- * no more malodour

Smart' Air

because we care

Smart' Air, programmable airfreshener with natural essential oil based fragrances

Stay Fresh
Environmental Services

The world of fragrances and some facts

Fact number 1

People love the scents of flowers and fresh fruit and appreciate their positive and stimulating effects

Fact number 2

People's olfactive memory associates these scents with an unspoiled nature and a healthy, clean environment

Fact number 3

First impressions count and good scents and a healthy, clean environment will create a positive attitude in your customers, visitors and staff

Why *Smart'Air* ?

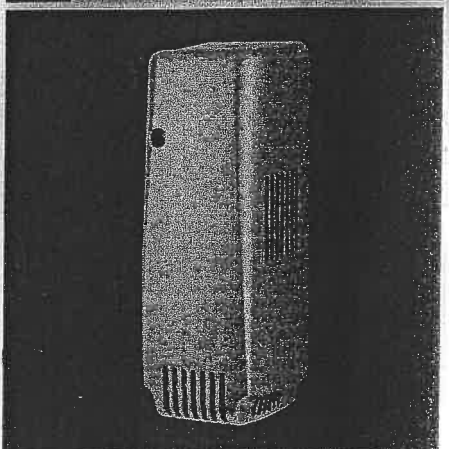

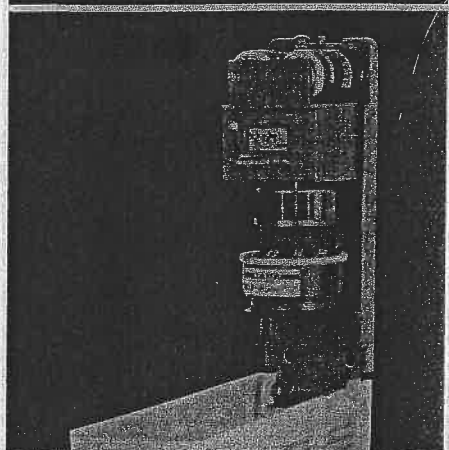

The *Smart'Air* system assures an even emission of fruity and floral scents and is highly appreciated in offices, conference rooms, nursery homes, washroom and toilet facilities. The fragrances used in the *Smart'Air* system are based on essential oils derived from fruits and flowers and, unlike aerosols with their propellents and synthetic fragrances, have a very low VOC content. VOC, i.e. volatile organic compounds, are known to contribute to the green-house effect

Performance

- *Smart'Air* fragrance refills combined with the programmable dispenser will provide a pleasant healthy air for 2 months
- The dispenser can be programmed to suit your working hours, e.g. from 8am till 6pm and from Monday to Friday
- One *Smart'Air* unit will be enough for rooms of 40m³

The dispenser

- Available in white ABS
- Chromized on special request
- 2 alkaline batteries LR20 will drive the fan for 12 months
- Dimensions h: 238mm w: 85mm d: 85mm

TCell™

The world's first continuous odor control system is the latest innovation by Technical Concepts. Utilizing its patented fluid delivery system, the TCell delivers a precise dose of pure designer fragrance and odor neutralizer for 60 days without the use of batteries.

Why Technical Concepts?

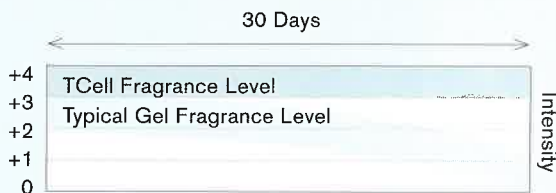

For as long as we've been around, Technical Concepts has developed innovative hygiene solutions for the washroom. Today, we are a global leader, designing and manufacturing products that make washrooms cleaner, environmentally friendly and more cost effective to maintain.

Through our commitment to research and development, we are constantly seeking ways to improve upon our industry-leading reliability, ease of installation and user-friendly performance.

A Long-Lasting Odor Control Solution

The TCell™ odor control system by Technical Concepts dispenses a consistent level of fragrance over 60 days. Conventional gel systems lose their fragrance intensity over the life of the refill, but TCell remains constant. When it comes time to change the refill it is quick and simple, taking less than a minute.

Fragrance Effectiveness: TCell vs. Gel

TCell refills contain Microtrans®, a true odor neutralizer. We use only the highest quality essential oils to reinforce the cleanliness of the washroom and image of the facility. They are available in a wide range of customer preferred fragrances from mild to intense for a clean, fresh scent that lasts.

Fragrance Intensity Range

Light				Intense				
Wakening Spring	Mango Blossom	Polar Mist	Summer Sorbet	Blue Splash	Cucumber Melon	Tropical Sunrise	Crystal Breeze	Citrus

The Perfect Environmental Solution

TCell promotes a clean, fresh washroom in an environmentally friendly way:

- Operates without batteries
- No propellants or added VOCs
- Recyclable components

How TCell Works

The fuel cell creates hydrogen with the fragrance chamber. As each molecule of hydrogen is created it forces (pushes) an equal volume of fragrance out of the chamber. Natural air flow in the washroom distributes the fragrance throughout the room.

Hand Sanitizer Liquid

Active ingredient
Ethanol - 65%
Electro Colloidal
Silver (ECS) - 3%

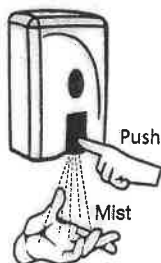

Perfume - 0.05%
Glycerin - 0.05%
B.O. Water - 31.9%

250ml

Using the Dispenser The sanitizing liquid spray is designed to be used without water. Just spray onto hands and rub

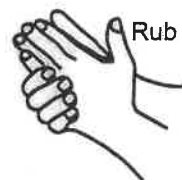

- 1 Hold one hand under the dispenser and press the button with the other once or twice.

A mist will spray onto hand.

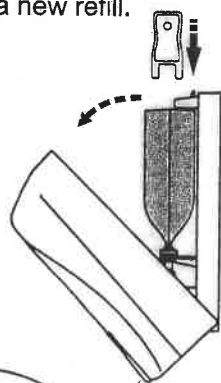

- 2 Rub hands together to spread the sanitizing liquid across all of both hands.

Rub for a few seconds only.
Sanitizing liquid will dry quickly.

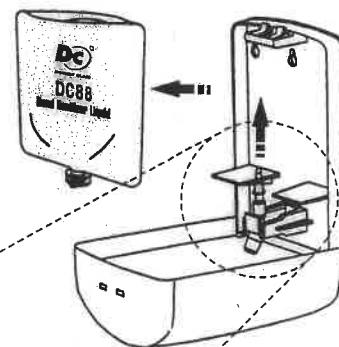

Refilling the Dispenser The dispenser has a disposable bag refill. Once a refill is empty, remove, dispose and install a new refill.

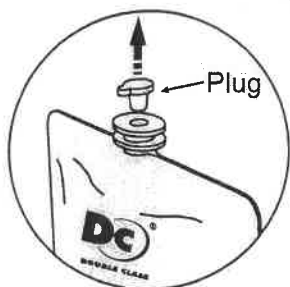

- 1 Open the unit by releasing the cover with the supplied key. Press the key into the two holes in the top to release and pull open the front cover.

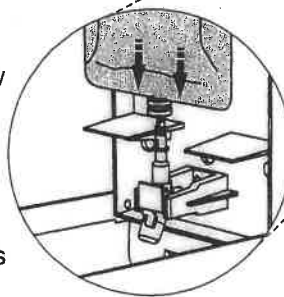

- 2 Remove the empty refill bag by pulling up from its base to release from the pump nozzle.

- 3 Remove the plug from a new refill bag mouth using fingers or a flat screw driver.

- 4 Insert the new refill bag by pushing the mouth of the bag onto the nozzle of the pump until it is fully inserted.

- 5 Close the front cover. Press the button a few times until the liquid sprays out.

SANITIZER

- THE AUTOMATIC TOILET CLEANING SYSTEM

Sanitizer System are design for both flushable urinals and water closet and can be easily incorporated with any automatic or conventional flushing system. Upon each flushing it cleans sanitizes and deodorises by dispensing a certain amount of chemical detergent into either urinal bowl or water closets. The special selected chemical detergent prevents the growth of bacteria and scale build-up by penetrating into deep inside urinal and toilet bowls and can be easily be replenished periodically with several choices of fragrance and refills lasting up to 30 to 45 days.

Hidden - staining and scale

Damaging hidden build-ups

- *cleans, protects, disinfect and deodorises toilet and urinals.
- *protects at the end of each flush.
- *reduce stains, scale build-up and bacterial growth.
- *prevent costly blocks and plumbing damages.
- *reduce malodours.

Encrustation build-up which in long run cause blockages and expensive plumbing repairs.

SANITIZER SERVICES - complete hygiene protection with every flush
